

Steven Wu

647-780-3084 | stevenwu3084@gmail.com | [LinkedIn](#) | steveu14.github.io

Skills & Certifications

Technical: Python, SQL, R, Excel, Power BI, Looker, Salesforce, Amplitude
Certifications: Google Data Analytics | Microsoft Power BI Data Analyst Associate (PL-300)

Experience

Insurance Analytics Associate | Zensurance Mar 2026 – Present
Remote

- Led cross-functional development of an internal pricing execution tool, streamlining operations and reducing processing time by 30%
- Built and deployed a **Python** automation script to optimize customer targeting workflows, accelerating monthly acquisition execution based on **Salesforce** funnel analysis
- Analyzed pricing and service performance data using **Looker** to surface trends and diagnose performance gaps, driving data-informed optimizations that improved conversion outcomes

Data Operations Associate | Ecclesiastical Insurance Nov 2024 – Mar 2026
Toronto, ON

- Improved operational efficiency by enhancing **Excel**-based underwriting templates and automating routine workflows using **Python**, reducing manual processing times and improving team throughput
- Developed and maintained reporting templates for underwriting data, improving consistency and speed of analysis across teams — supporting clear communication of insights to technical and non-technical stakeholders
- Collaborated with claims and underwriting teams to gather and analyze operational data, delivering actionable insights to support performance monitoring and KPI tracking
- Enhanced data validation procedures, improving data accuracy and enabling faster resolution of discrepancies across month-end reporting cycles

Education

Georgia Institute of Technology — M.S. Analytics, Computational Data Analytics Aug 2026 – Dec 2028

Wilfrid Laurier University — B.A. Economics Sept 2019 – June 2024

Relevant Courses: Applied Econometrics, Machine Learning in Economics, Managerial Statistics, Information Processing with Microcomputer Systems, Computer Programming

Projects

Personal Finance Tracker | Next.js · TypeScript · React · Plaid API · SQL · Recharts

- Built a full-stack personal finance web application using **Next.js** and **TypeScript**, integrating the **Plaid API** to securely connect real bank and credit card accounts and pull live transaction data in production
- Queried and aggregated transaction data using **SQL** to power category-level spending summaries, time-range filters (1D, 7D, 30D, 90D), and month-over-month comparisons surfaced across dashboard views
- Built a monthly budget tracking module displaying budgeted vs. actual spend with a dynamic progress bar, per-category cost breakdowns, and remaining balance indicators

Calorie & Macro Tracker | Next.js · OpenAI API · SQLite · SQL

- Built a web-based nutrition tracking application with real-time data processing that validates, aggregates, and recalculates derived metrics dynamically as inputs are updated
- Designed interactive dashboards and time-series visualizations to monitor key nutritional metrics over time, enabling structured, data-driven tracking and evaluation
- Designed and queried a **SQLite** database using **SQL** to store and analyze meal data, enabling efficient retrieval of calorie and protein intake trends against user-defined goals

NBA Performance Compensation Analysis | Python · pandas · StatsModels · Matplotlib

- Conducted regression analysis using **pandas** and **StatsModels** to identify key performance drivers and their relationship to player compensation, surfacing insights for data-driven decision-making
- Delivered findings through statistical modeling and visualizations, communicating complex quantitative results to both technical and non-technical audiences
